Aloha from the Chair

E Komo Mai (Welcome) to the Department of Obstetrics, Gynecology, and Women’s Health at the John A. Burns School of Medicine (JABSOM), University of Hawai‘i at Manoa. Our journey of lifelong learning, discovery, and healing has been filled with rewards and challenges this past year, as we embarked in new endeavors to promote excellence in education, research, clinical care, and community service in a sustainable fashion.

We opened our first faculty practice office in Hilo, Hawai‘i Island in an effort to address community needs in women’s health (OB/GYN shortage), advance general OB/GYN and subspecialty care, and create a sustainable clinical learning environment for our medical students and residents. We have many to thank for this accomplishment, which made history as the first JABSOM Faculty Practice outside of Oahu. Dr. John Uohara, a first generation JABSOM graduate joined our department upon retiring from clinical practice to lead our Hilo Division and spearhead community partnerships on Hawai‘i Island. Dr. Emilie Stickley, a former Tripler physician, left a lucrative private practice on Oahu to join our Hilo team. Our dedicated staff lead by Miyuki Hannemann went above and beyond to ensure successful faculty practice opening and operations. Dr. Celeste Adrian has recently joined our Hilo team, and we are in the process of recruiting an additional faculty member. As a new academic year approaches, we look forward to starting our Hilo resident rotation which will offer our learners invaluable training in a low-resources setting to complement the training we currently offer in Honolulu. The support of Hilo Medical Center and Hawaii Health Systems Corporation, specially Dr. Linda Rosen and Dr. Kathleen Katt, have been key to realizing this milestone and a testament to our continuous commitment to promoting excellence in education while upholding outstanding quality of service to the women of Hawai‘i. In addition, we opened a brand new faculty practice office at Pali Momi Medical Center to serve our patients closer to their homes and further advance our clinical learning environment as well as our partnership with Hawaii Pacific Health. We also partnered with Wahiawa Center for Community Health addressing health disparities and serving the community in central Oahu. Wahiawa is the newest addition to the already well established FQHC partnerships with Waianae, Kalihi-Palama, Waimanalo, Lanai, Mālama Clinic on Maui, and Bay Clinic in Hilo.

We continue to foster an environment of academic excellence. Twenty-four faculty members have been promoted since 2012. Our faculty continues to hold leadership roles in major national and international organizations, and three of our faculty serve as examiners with ABOG. Dr. Tricia Wright was named “Distinguished Fellow” of the American Society of Addiction Medicine. Dr. Bliss Kaneshiro was awarded the Society of Family Planning 2018 Robert A. Hatcher Family Planning Mentor Award. Dr. Ann Chang was recognized with the Society for Academic Specialists in General OB/GYN’s 2019 Faculty Award. I was promoted to fellow of the International Academy of Perinatal Medicine. Over the last year, our students, residents, fellows, and faculty have published 44 peer-reviewed articles, presented 17 abstracts, and secured over $1.5 M in grants.

Philanthropy is a hallmark of academic institutions and testament of its value creating greater good. We have been blessed with major investments made by Dr. Thomas Kosasa, Dr. Santosh Sharma, Dr. Angela Pratt, Dr. Dena Towner, and many others. Our department currently has two endowed chairs, 5 endowed professors and several endowed programs. This year’s internal giving campaign was also exceptional. We do deeply believe in ourselves.

As we navigate these shifting times in health care and clinical learning environments, collaboration with deeply rooted Ohana spirit is key to moving forward in our mission. I want to thank each and every one of our clinicians, researchers, educators, staff, and partners for their relentless commitment to advancing Women’s Health in Hawai‘i. The best is yet to come.

Ivica Zalud, MD, PhD, FACOG, FAIUM
Professor and Chair
Kosasa Endowed Chair
Celeste Adrian, MD, Clinical Instructor

Undergraduate Education: BS in Biology, Texas Wesleyan University, Fort Worth, TX  
Medical Education: MD, The University of Texas Medical Branch, Galveston, TX  
Internship and Residency: OB/GYN, Hawai‘i Residency Program, Honolulu, HI

Lisa Bartholomew, MD, Associate Professor

Undergraduate Education: BS in Biology, College of Charleston, Charleston, SC; BS in Biochemistry, College of Charleston, Charleston, SC  
Medical Education: MD, University of Miami, School of Medicine, Miami, FL  
Internship and Residency: OB/GYN, Boston City Hospital-Boston University Medical Center, MA  
Fellowship: Maternal-Fetal Medicine, George Washington University Medical Center, Washington, D.C.

Janet Burlingame, MD, Associate Professor

Undergraduate Education: BA in Biochemical Sciences, Harvard University, Cambridge, MA  
Medical Education: MD, Columbia University, College of Physicians & Surgeons, New York, NY  
Internship and Residency: OB/GYN, University Health Center of Pittsburg Magee Women’s Hospital, Pittsburgh, PA  
Fellowship: Maternal-Fetal Medicine, University of California, San Francisco, CA; Maternal-Fetal Medicine Ultrasound, University of California, San Francisco, CA

Michael Carney, MD, Professor  
Gynecologic Oncology Division Chief  
Kosasa Endowed Professor

Undergraduate Education: BS in Biology and Business Administration/Marketing, University of Illinois, Urbana, Champaign, IL  
Medical Education: MD, Loyola University of Chicago, Stritch School of Medicine, Maywood, IL  
Internship and Residency: OB/GYN, Duke University Medical Center, Durham, NC  
Fellowship: Gynecologic Oncology, Duke University Medical Center, Durham, NC
Ann Chang, MD, MPH, Associate Professor
*Associate Residency Program Director*
*Generalist Division Chief (KMCWC)*

**Post Graduate Education:** PhD, University of Zagreb, Zagreb, Croatia

**Internship and Residency:** OB/GYN, Winthrop University Hospital, Mineola, NY

**Fellowship:** Maternal-Fetal Medicine, Georgetown University, Washington, D.C.
Department Divisions

Family Planning

All women in Hawai‘i should be able to make reproductive decisions that are consistent with their own values. The physicians of the Division of Family Planning provide medical and surgical abortion services and miscarriage management to women throughout Hawai‘i. With three Family Planning fellowship trained physicians, we provide comprehensive contraceptive services and specialize in innovative contraceptive technologies.

We are well-equipped to provide care to patients with complex medical issues. Our division receives referrals from across the state, and we are expanding telemedicine services to provide improved access for women living on the neighbor islands. We are also committed to training the next generation of physicians. In 2006, our division established the Ryan Residency Training Program, and in 2011, we were accredited for a Family Planning Fellowship. Our graduated fellows are considered experts in their field both in Hawai‘i and throughout the world.

As leaders in family planning research, the Women’s Health Research Center was awarded more than 2.3 million dollars in 2017 for family planning research funding. This funding helped us bring in cutting-edge research to benefit the women of Hawai‘i.

General Obstetrics & Gynecology

The General Obstetrics and Gynecology division focuses on female reproductive health and maternal health during pregnancy, childbirth and the postpartum period. Physicians in the division provide exceptional care at every stage of a female’s life.

Some of our physicians were recognized in the Honolulu Magazine’s Best Doctors of 2017. Generalist physicians care for patients in both outpatient and inpatient settings. Outpatient settings include federally qualified health centers and faculty practices located throughout the state, both on O‘ahu and the neighbor islands. Physicians also serve as hospitalists, providing urgent and emergent obstetrical and gynecologic care. While the division is focused on serving the medical and surgical needs of its community, it is not limited to clinical care. Division members also focus on clinical research and educating future physicians through its student clerkship rotations and its OB/GYN residency program to serve both the women of Hawai‘i and advance women’s health care in our state.

Our Generalist division is leading the charge to make obstetrical care safer and in line with established best practices on labor and delivery and in the emergency department, establishing safety programs and protocols for gynecological care and surgery in the operating room and in the acute care and emergency settings.
**Gynecologic Oncology**

The Division of Gynecologic Oncology primarily cares for women diagnosed with potentially malignant, pre-malignant and malignant gynecologic conditions. We care for women who require specialized pelvic surgeries, complicated pelvic surgeries, or minimally invasive approaches to surgical conditions. Our academic physicians are nationally renowned experts who compassionately care for women with ovarian, uterine, cervical, vaginal, vulvar, and other gynecologic cancers. We use the most advanced surgical techniques and provide the most up-to-date treatments for our patients. This includes opportunities to receive the newest medications within National Cancer Institute sponsored clinical trials right here in Hawai’i. Our division is constantly performing research to learn more about these cancers. Our team works closely with patient navigators, social workers, pain and palliative care providers, emotional and psychological support experts, financial resource experts, and other providers. We all work together as an integrated cancer team that always provides the patient with the best opportunity for a good experience and best possible result.

We also care for patients who require expert surgical care for complicated conditions. These conditions include abnormal pap smears, pelvic masses, endometriosis, or a desire for minimally invasive surgical approaches including robotic surgery. Robotic surgery is a major surgery which requires tremendous surgical skill and allows patients to go home, often in the same day, to return to their normal lives quickly.

The gynecologic oncology division cares for all women of Hawai’i and the Pacific. Our work is concentrated in Honolulu, but we also provide neighbor island outreach and work. We work with local teams to ensure our patients the very best quality care.

**Maternal-Fetal Medicine**

Maternal-Fetal Medicine physicians are high-risk obstetricians who have extensive training in providing care for women with medical complications during pregnancy and prenatal diagnosis for fetuses with high risk problems. We specialize in providing prenatal care and consultative care for pregnant women with medical conditions, including diabetes, hypertension, congenital heart defects, epilepsy, lupus, and cancer. Members of our division provide medical care for women carrying fetuses with birth defects, genetically inherited diseases, blood incompatibility issues, congenital infections, triplet pregnancies and other higher order multiple gestations. We also provide care for other diseases unique to pregnancy in coordination with Neonatology, Pediatric Cardiology, Pediatric Genetics, Pediatric Surgery, and Family Planning services.

In addition, we provide prenatal fetal ultrasound, fetal echocardiogram, prenatal genetic testing with amniocentesis, chorionic villus sampling, as well as the latest advances in non-invasive prenatal screening. We also provide supportive care for women with recurrent pregnancy loss, stillbirth, and disorders of the placenta.

Our prenatal diagnosis and consultative services are primarily based at the Kapi‘olani Medical Center Fetal Diagnostic Center. We recently extended our prenatal services to the Pali Momi Women’s Center on O‘ahu; Wilcox Memorial Hospital on Kaua‘i; and the Mālama I Ke Ola Health Center, a Federally Qualified Health Center, on Maui. We have developed a new Maternal-Fetal Medicine clinical care program at Kapiolani Medical Center in which pregnant women can be seen for ultrasound, genetic counseling, diabetes management, and high-
risk pregnancy consultation in one convenient location in the hospital’s Fetal Diagnostic Center. We also plan to open up new partnerships on the Big Island and expand our Maternal-Fetal Medicine services over the next year with telemedicine and innovative programs for home-based prenatal care services for women living in rural Hawaii.

Additionally, we have set up a collaboration with the Institute for Biogenesis Research at UH Manoa to develop a basic science research laboratory, and are assuming the management of the Hawaii Reproductive Specimen Biorepository at the John A. Burns School of Medicine.

Reproductive Endocrinology & Infertility

The faculty of the Division of Reproductive Endocrinology and Infertility provide a wide range of clinical services and research for women with various gynecologic, hormonal, menopausal, and reproductive disorders, which includes a highly successful in vitro fertilization program. In addition to teaching responsibilities for residents and medical students, faculty members are engaged in a number of clinical research projects.

Research

The role of the Research Division is to support all research efforts in the Department of Obstetrics, Gynecology, and Women’s Health. The division's faculty are researchers who direct their own research projects and serve the department through the goals of the division. These goals are to:

- Develop the overall research endeavors of the department.
- Grow the research to sustainable levels.
- Find meaningful ways of integrating the research through successful collaborations.
- Provide mentorship for all faculty, fellows, and residents in research.
- Build and maintain the departmental research infrastructure.

Urogynecology

Urogynecology and Pelvic Reconstructive Surgery Division treats women with a full spectrum of conditions related to the bladder and reproductive organs. Our physicians are Board Certified in Obstetrics and Gynecology as well as Female Pelvic Medicine and Reconstructive Surgery. We offer cutting-edge diagnostic and treatment options for women with complex pelvic floor disorders, such as urinary incontinence, overactive bladder syndromes, pelvic organ prolapse, voiding and defecatory dysfunction, fecal incontinence, pelvic organ fistulas, diverticula and vaginal agenesis. Not all conditions require surgical treatment, but if surgery is necessary, all of our physicians are skilled at minimally invasive surgical techniques that often speed recovery time and eliminate the need for a hospital stay. Services are provided at several hospitals and surgicenters on Oahu, and we receive referrals from all islands in the State of Hawai’i. We have expanded our services to provide care on the Island of Hawai’i and the Island of Maui in the near future.
Undergraduate Medical Education

The John A. Burns School of Medicine (JABSOM) is currently one of only a handful of schools in the nation to convert its curriculum to a problem-based learning format (PBL). PBL was adapted from McMaster University, Canada and introduced in 1989. The traditional system, which had an emphasis on teacher directed learning, passive student participation, and rote memorization of massive amounts of information, was seen as increasingly inefficient and outmoded. PBLs seek to solve the shortcomings of this conventional approach with a new mode of learning that is active, dynamic, self-motivational, and directed. For this system to work, it is essential that students be self-directed and take responsibility for their own learning. The primary objective of PBL is to accumulate the concepts of facts of medicine in a clinical context, basing the need to know on relevant problems at hand. Instead of being passive recipients of information, students can become actively involved in the learning process.

The Department of Obstetrics, Gynecology, and Women’s Health works with all levels of medical students. During the 1st year, students are able to work with faculty members who serve as their clinical preceptors. In addition to being clinical preceptors, faculty members serve as PBL tutors and give basic science lectures to 2nd year students.

JABSOM offers medical students two venues to completing their 3rd year clinical clerkships. Students may choose between a traditional block or longitudinal rotation. Block students spend 7-weeks on obstetrics and gynecology, while longitudinal students work 6 months in a rural outpatient setting and another 6 months in weekly inpatient block rotations.

The purpose of the department is to give the student a basic foundation in Obstetrics and Gynecology and the problems related to that field. The goals expected of the 3rd year medical student include, but are not limited to:

1. Perform directed history and physical examinations, including the pelvic exam
2. Diagnose and manage typical gynecologic conditions:
   - Understand the natural course of gynecologic diseases
   - Know about major types of family planning techniques
   - Understand the female life cycle beginning at puberty
3. Diagnose and manage typical obstetric conditions:
   - Apply knowledge of physiologic changes that occur during pregnancy to the pregnant patient
   - Understand prenatal and postpartum care
   - Recognize effects of surgical and medical problems on pregnancy
   - Manage normal labor and delivery
   - Know the management procedures for abnormal labor and delivery
   - Understand the management of pain/anesthesia in labor and delivery
4. Understand major psychosocial problems and know the resources available to women:
   - Appreciate psychosocial and sexual problems of the female patient and her family, including domestic violence
• Be aware of the social and health services available to women

Students work 3 ½ weeks on gynecology surgery and 3 ½ weeks on labor and delivery, with assigned outpatient clinic day and night calls on labor and delivery.

Student didactic sessions are scheduled for Friday mornings. These include faculty teaching sessions and department conferences.

Some faculty topics discussed are:
- Antepartum Fetal Testing
- Gestational Trophoblastic Disease
- Vulvar Disease Vaginitis
- Intrapartum Care Contraception/Sterilization
- Preterm Labor/PPROM Family Planning
- Induced Abortion & Vital Statistics Chronic Pelvic Pain
- Isoimmunization Multiple Gestation, Diagnosis and Management
- Puberty/Premenstrual Syndrome

We offer various types of electives to the 4th year medical students. Among them are Sub Internship in Labor & Delivery, Reproductive Endocrinology, High Risk Obstetrics, Gynecology Oncology, and Outpatient Clinic. Students are encouraged to work at the capacity level of an intern.

About our Program

The University of Hawai‘i John A. Burns School of Medicine Residency Training Program in Obstetrics & Gynecology is located in Honolulu, Hawai‘i. The program was originally established in 1949 and is based at the Kapi‘olani Medical Center for Women & Children with additional rotations at the Queen’s Medical Center, Kaiser Medical Center and Pali Momi Medical Center.

The primary aim of the program is to train generalist OB/GYN physicians who will advance women’s health care. The residency is uniquely positioned as a hybrid between a highly academic university program and a community-based clinical program. Resident training utilizes adult-centered learning techniques and exposes trainees to a broad spectrum of clinical experiences.

The residency program is fully accredited by the Accreditation Council of Graduate Medical Education and approved for a total of 24 categorical resident positions, six at each level of the four-year program, and 1 one-year preliminary position.

The Residents of the University of Hawai‘i
Department of Obstetrics, Gynecology, & Women’s Health Statement:

“The Ob-Gyn Residents of the University of Hawai‘i acknowledge that it is a privilege to be part of this residency program and this profession. We are committed to providing quality health care to all the women of our island community and beyond. We are dedicated to evidence-based, lifelong learning and becoming technically proficient physicians in the field of obstetrics and gynecology. We will stay abreast of, and when possible directly participate in, current research in our field with the ultimate goal of providing superior care for our patients. We strive to maintain an environment that encourages camaraderie and good rapport among the entire healthcare team. As colleagues, we will support each other professionally as well as personally, and build lifelong friendships.”
Maternal-Fetal Medicine Fellowship

The fellowship in Maternal-Fetal Medicine at the University of Hawai‘i combines exceptional training for future maternal-fetal medicine physicians in clinical practice and academic medicine. The fellows acquire knowledge of the basic and clinical facets of perinatal medicine and develop skills to conduct clinical and/or basic research related to our sub-specialty. Fellows will gain an extensive knowledge base and develop experiences in the management of common and unusual obstetrical and medical complications, including those conditions unique to Hawai‘i and the Pacific Rim. This will enable them to manage such patients and to function as a consultant for obstetricians requesting input.

In addition, the fellows have the option to complete a Master of Science in Clinical Research Degree administered through the University of Hawai‘i at Manoa. Upon completion of the program, fellows will be able to effectively conduct and analyze new research and decide how to apply new knowledge.

Additionally, fellows will be able to serve as experts in their community, advising others in the application of new knowledge. We anticipate that they will become clinician-researchers and advance medical knowledge in the MFM discipline.

Family Planning Fellowship

The UH Fellowship in Family Planning was established in 2012. The two-year fellowship program follows the education, research, policy, and international health requirements outlined by the National Office of the Family Planning Fellowship.

Fellows complete a master’s degree in either Public Health or Clinical Research, participate in an international Family Planning rotation, develop and complete a research project, and have the opportunity to participate in many policy and professional development learning opportunities locally and with their national cohort of fellows.

Graduates of the fellowship are experts in complex family planning clinical care, family planning clinical and translational research, family planning public health and public policy, and family planning education.

Clinical Training:
- All methods of pregnancy termination
- All diagnostic methods to confirm uterine and tubal pregnancy
- Anesthesia and pain control
- Ultrasonography related to contraception and abortion
- Treatment of complications
- All methods of contraception currently available and under investigation
- Sterilization

Teaching:
- Hands-on and didactic teaching for residents and medical students

Research:
- Study design and structured clinical research
- Statistical analysis
- Guidance in obtaining funding for research studies in contraception and abortion
- Scientific writing for peer-reviewed journals and other academic publications
- Presentation at national conferences
- Development as an independent researcher/teacher
- Grant writing

Workshops:
- Building a Ryan Program: Starting an academic career by establishing a Ryan Residency Training Program in Abortion and Contraception. For Ryan Program directors as well as current and graduated Fellows.
- International: Primary orientation the the Fellowship International Placement requirement. Offers networking opportunities with other fellows, directors, and international experts.
- Leadership: The organizational and personal leadership skills needed to navigate departmental, institutional, and larger social barriers in career development while also supporting fellows’ capacity to work as advocates for family planning. Intended for graduated Fellows.
- Psychosocial Issues in Abortion Care: An open forum for discussion and exchange related to the psychosocial components of doing and teaching abortion. For current and graduated Fellows and all Fellowship directors.

Department Conference:
“Community Collaborations: Obstetrics, Genetics, and Ultrasound”
Presented in Collaboration with
Ian Donald Inter-University School of Medical Ultrasound Hawai‘i
Alohilani Resort Waikiki Beach
December 14-15, 2018

Learning Objectives:
• Compare first trimester genetic screening modalities
• Discuss appropriate indications and the economics of adopting new ultrasound and genetic tests
• Explain how Dopplers and biophysical profiles are used for antenatal fetal surveillance
• Identify the criteria used in pelvic ultrasound for evaluation of gynecologic patients (ovarian cancer, pelvic masses)
• Review options for management of challenging clinical OB/GYN cases including substance abuse.
• Update on thrombophilia and pregnancy

Keynote Speaker:
Charles Lockwood, MD, MHCM
Senior Vice President, University of South Florida (USF) Health
Dean, USF Health Morsani College of Medicine
“Healthcare Reform and the OB/GYN”
“Management and Imaging of Zika Virus and Other Neuropathic Infections”
“Prevention of Thromboembolism in OB/GYN”

Invited Speakers:
Frank Chervenak, MD
Chair, Obstetrics & Gynecology, Lenox Hill Hospital
Chair, Obstetrics & Gynecology, Associate Dean for International Medicine
Zucker School of Medicine at Hofstra/ Northwell
“Is there overenthusiasm for NIPT?”
“How to counsel a patient when a fetal anomaly is diagnosed with ultrasound”
“Professionalism: The Foundation of Obstetrics and Gynecology”

Eberhard Merz, MD
Professor of Obstetrics and Gynecology, Krakenhaus Nordwest Hospital,
Goethe University of Frankfurt, Main
Head of the Center for Ultrasound and Perinatal Medicine and Center for Reproductive Medicine, Frankfurt
President of The Fetal Medicine Foundation – Germany
Director Ian Donald School – Germany
“The Future of 3D Ultrasound in OB/GYN”
“3D/4D Ultrasound: What to Do and What Not to Do”
“Imaging of Congenital Uterine Malformations”

Brian Shaffer, MD
Associate Professor of Obstetrics and Gynecology, OHSU School of Medicine
“Direct to Consumer Carrier Screening”
“When and How to Use Microarray Analysis in Prenatal Diagnosis”
“Unusual Abdominal Wall Defects in the Fetus”

Philanthropy

On August 15, 2018 we came together for the unveiling of our OB/GYN Donor Wall in humble recognition to those who have contributed to our department with endowments and visiting professorships.

Our “Koa” investors enable us to journey beyond the present by funding initiatives that take us into tomorrow. These are:
- Kosasa Endowed Chair in Obstetrics, Gynecology, and Women’s Health
- Lakshmi Devi and Devraj Sharma Endowed Chair in Obstetrics, Gynecology, and Women’s Health

Our “Kukui” investors share our commitment to life-long learning and support our efforts to advance medical knowledge;
- Kosasa Endowed Professorship I in Obstetrics, Gynecology, and Women’s Health
- Kosasa Endowed Professorship II in Obstetrics, Gynecology, and Women’s Health
- Kosasa Endowed Professorship in Gynecologic Oncology
- Colin C. McCorriston, M.D. Endowed Professorship in Obstetrics, Gynecology, and Women’s Health

Our “Niu” investors help us sustain our mission of educating learners in the art and science of obstetrics and gynecology;
- John A. Krieger, M.D. Lectureship Endowment Fund
- Dr. Angela M. Pratt Endowment
- Dena Towner Maternal Fetal Medicine Endowment
- Ralph and Jane Hale Scholarship Endowment
- Colin C. McCorriston, M.D. and Helen D. McCorriston Endowed Scholarship
- Philip I. McNamee, M.D. Award Endowment
- John M. Ohtani, M.D. Award Endowment
Our “Ōhi’a lehua” investors help us to serve the day-to-day needs of this special island community and represent our Internal Giving Campaign donors.

We are truly blessed to have such strong confidence from many donors. Their investments are a testament to their trust. Every donation, big or small will help generations to come. We are making a difference.

(L-R) Dean Hedges; Dena Towner, MD; Ivica Zalud, MD, PhD; Santosh Sharma, MD; Angela Pratt, MD

(L-R) William McCorriston, JD; Dean Hedges; Ivica Zalud, MD, PhD; Thomas Kosasa, MD
